You are developing the knowledge and ability to perform work allocated in the BDG vehicle workshop. You also have well developed verbal, written communication and numerical skills and can undertake quality assurance functions for the critical feedback and reporting to BDG Management Team

In this role you will:

You will strive to produce high quality work in a busy work environment by adhering to correct procedures in a safe and efficient manner and actively participate in a research and development environment. You will develop the knowledge and ability to perform work across other business streams including dispatch logistics and other areas of production work.

Actively contribute to the outputs to meet all business objectives and requirements.

Provide a high level of professionalism to contribute to a culture of alignment to BDG objectives, where you will ensure a priority of client service and maintain the BDG standards.

About us

In 1972, Gregory Bailey started a diesel fuel injection repair business in Sydney, New South Wales, Australia. Today, CEO Stephen Bailey provides all innovation, improvements and direction of all products including research and development within the Baileys Diesel Group.

With over 47 years expertise and knowledge the Baileys Diesel Group is an industry world leader, #1 diesel combustion efficiency and technology. We actively participate in servicing, maintaining and improving industrial, rail, marine, mining, off- highway and on-road vehicles.

Baileys Diesel Group operates from Baileys Diesel Technology Centre in Wollongong New South Wales. This is a state of the art, 1500m² all-inclusive facility south of Sydney, New South Wales. The Baileys Diesel Group also operates a satellite office in Perth, Western Australia.

Baileys Diesel Group focus is on reducing the fuel expended during combustion, therefore reducing the carbon footprint by actively participating in reducing greenhouse gases and emissions, other benefits include reducing overall costs, down time and engine maintenance.

We are aligned with views of United Nations 2030 Agenda and commitment to reduce these international emissions targets.

The Baileys Diesel Group clearly knows our purpose; to serve our clients by the ability to compare, improve measure and validate to international standards. We deliver quality results and superior client service in everything we undertake.

Our vision

To assist clients to reduce all fuel consumption by applying efficient diesel combustion whilst reducing carbon emissions, and therefore reducing environmental and social impacts.

Our values

Environmental: actively reduce greenhouse gases and emissions

Ethical: consistent application of strong moral and ethical principles

Commitment: measure, compare, improve and validate

Efficiency: innovate in all areas of development, technology and manufacturing

Operations: support sound project management and methodology principles

Our mission

Baileys Diesel Group is proudly #1 in combustion efficiency. We provide quality diesel performance products and solutions with stringent quality assurance, and a focus to enhance Sustainable Development goals.

BDG Benefits

BDG offer employees an interesting, challenging and rewarding career with the opportunity to work independently whilst enjoying the benefits of a large organisation. BDG is committed to supporting the successful candidates with on-going training and development for career progression.

All tools and PPE boots, BDG shirts (also BDG uniform dry cleaned) are supplied, we also offer a staff purchase policy on BDG products and vehicle shop repairs.
